ONLINE PLANTER PORTAL

ABSTRACT

Online Planter Portal is the web application which helps planter by providing various kinds rubber related information and services in the website. This website helps planters by providing them a large online market to sell their produce.

Customer can send purchase request and they can purchase product through website. Even planters can hire labour and they can be updated with the latest developments with articles and blogs module.

Admin can post latest news and articles and he can sell agriculture machinery products in the website.

Workers can upload their resume and they can view work schedules after the login.

To provide technology and services to the planters, sellers and labour thus, helping them to expand their business and provide them with a wider market. Hence, improve the present planter processes and to provide knowledge about recent issues. To provide a helping hand to the planters and labours in improving their lives through the medium of technology, thereby, improving the Indian economy.
